## SUMMARY

Experienced Data Science and GenAI leader with 9 years of experience spanning Data-Scientist, Consulting, and Product roles. Strong technical foundation in ML modeling, Agentic architectures, and Cloud Solutioning. Adept at translating complex business requirements into scalable AI systems designs and managing cross-functional teams to deliver business teams.

## WORK EXPERIENCE

### Senior Data Scientist 2 – Delivery and Product

May '25 – Present (6 months)

OneByZero Pvt Ltd

- **Context:** *AI Factory* is a platform by OBZ to build, deploy and manage production grade AI agents for Voice, Chat and Custom Flows
- **Role:** Lead Client facing delivery lead for AI Agents, and expansion of AI Factory, both in a PM and hands-on developer capacity
  - Delivery of outbound cross-sell voice agent for a Philippines Telco - matched human conversion rates and reduced CAC by 40%
  - Delivery of inbound customer support chat-agent for a Philippines Telco – Increased containment rate from 40% to 70% and feedback score from 6.3 to 8.4, as compared to the original traditional rule-based chatbot.
  - Developed the backend APIs for the following enhancements to the AI Factory
    - **Workflow Evaluations** – Comparing actual agent-runs to golden workflows using LLM-as-a-Judge and analysing the gap patterns.
    - **Flow Prompting** – Creating multi-stage agents via a single text prompt, embedding best practices from prior successful deliveries.
  - Led product management for AI Factory's **Command Centre** – a unified platform for monitoring, governance, and analytics of all deployed AI agents, evolving it from a drag-and-drop config tool into a production-grade deployment platform.

### Senior Product Manager – Gen AI

Nov 2023 – May 2025 (18 Months)

O9 Solutions Pvt Ltd

- **Role:** Founding PM leading the GenAI charter for the Supply-Chain Planning SaaS platform. Led delivery of the following functionality -
  - **Digital Assistant**– Conversational interface for interacting with platform wiki, documents, data, reports, workflows and other platform functionality. LangGraph flows with iterative parsing and redirection- with tool-calling, RAG, and NL2SQL capabilities
  - **Work-Flows** – Low-Code drag-and-drop interface to build workflows, which enable custom analyses on real-time user inputs.
  - **Customized Insights** – Summaries for dashboards and reports, highlight relevant insights based on user persona and past interactions
- **Impact:** Piloted in 6 enterprises, serving 1000+ planners and execs within 5 months of launch
  - Digital Assistant improved self-service rate for execs by 80%, and NPS by 10%; >60% repeat usage rate with >80%+ positive feedback
  - Workflows allowed junior planners to run complex analysis, reducing analysis time by 70%, saving planners 4-5 hours per week

### Senior Product Manager - Personalization

Nov 2022 – Nov 2023 (12 Months)

Times Internet (TimesOfIndia.com)

- **Role:** Drive transition from editorial-driven to fully personalized content on TOI Website, App, Push Notifications, end-to-end from data collection, ML-modelling, experimentation and fine-tuning, and platform integrations
  - Work with multiple teams to understand their data schema and build data-pipelines to consolidate them into a **centralized data-lake**.
  - Led **stakeholder alignments** for transition plans from editorial-led to personalized content for multiple widgets across the user-journey
  - **Extensive experimentation (A/B tests)** for testing multiple ML models, configurations, and other approaches on different content-type and user-cohorts. Leveraging explore-exploit trade-offs to align on optimal recommendation logic.
- **Impact:** 3.5x lift in Clickthrough Rate ( ~2% to ~7%); 24% lift in Pages/Session; 35% lift in Revenue/User on target user-base

### Data Product Manager

Jan 2021 – Nov 2022 (23 Months)

Apollo 247

- **Role:** - Set-up organization's data infra – ETL pipelines, Data Lake; platform for personalization, A/B testing, and performance monitoring - Introduce the following features to personalize user-journey and improve UX, on and off-platform.
  - **Improved Recommendations** – Dynamic recommendations based on omnichannel interactions across the Apollo Ecosystem (Pharmacy hospital, clinics, diagnostics ) adjusted for time since last purchase/consultation. Increase CTR by 13% and subsequent conversion by 28%.
  - **Relevant Redirection:** Banners with personalized CTAs and offers on home and other app screens. **Reduce bounce rate by 12%.**
  - **Checkout Screen Recommendations** based on cart-value- free-delivery/offer threshold, user-persona etc. **Increased AOV by 9%**
  - **Soft Subscription:** Voluntary Reminders for chronic medication with pre-made carts and single-click checkout. **16% in lift repeat rate**
  - **ML based Customer targeting:** improved focus, helped **reducing marketing expense by 14%** while **increasing repeat rate by 9%**

### Senior Consultant, Data-Science

Mar 2019 – Jan 2021 (23 Months)

Capgemini Invent

- **Role:** Lead Techno-Functional Consultant for advanced Machine Learning projects. Led productization of some of the tools.
  - **ProFil:** (Productization of a project) - A recruitment tool that matched most relevant profiles for a JD, extracted salient information, and enabled semantic search. Leveraged transformers (BERT) for embedding and NER, and Siamese Neural Networks for matching.
  - Risk profiling for an Insurance by forecasting disease progression and care gaps

### Data-Scientist

Jun 2015 – May 2017 (24 Months)

Knowledge Foundry Business Solutions

- **Role:** ML Engineer deriving actionable insights and building perfrom client data
  - Strategy for a Retail Chain client – analyzing impact of incentive campaigns and media outreach on sales, profitability and footfalls.
  - Developed Recommendation Engine for digital media client –led to **3x lift in CTR**

## EDUCATION

**Management Development Institute (MDI),  
Gurgaon**

MBA (Finance, Marketing)  
2017-19

**Indian Institute of Technology (IIT)-BHU, Varanasi**  
B.Tech (Chemical Engineering)

2011-15

## CERTIFICATIONS

**AWS Certified Machine Learning Specialist**

Jan 2021

Build, train, tune, and deploy scalable machine learning models using AWS services and MLOps best practices

[Score: **931 / 1000**]

**AWS Certified Solution Architect Associate**

Dec 2020

Design and deploy, and scale cost and performance optimized solutions using AWS services

[Score: 783 / 1000]

**Digital Product Management Specialization by University of Virginia (Coursera)**

May 2020

5 course series (>80 hours) explaining best practices for testing product-market fit, leading agile teams and other product fundamentals

**Deep Learning Specialization by DeepLearning.ai**

Sep 2018

5 course series (>120 hours) explaining various Neural Network architectures and guidelines for structuring DS projects

## SKILLS

|                  |                                    |                                   |                                      |
|------------------|------------------------------------|-----------------------------------|--------------------------------------|
| Product Strategy | • Product Vision & Road mapping    | • Stakeholder Management          | • User Experience & Journey Mapping  |
|                  | • Data Driven Insights             | • Experimentation and A/B Testing | • Agile Development                  |
| Technical Skills | • Solution Architecture (HLD, LLD) | • Cloud (2x AWS Certified)        | • Python (Advanced), SQL, JavaScript |
| Generative AI    | • Agentic AI Architecture          | • HITL application design         | • LangChain / LangGraph Ecosystem    |
|                  | • Retrieval Augmented Gen (RAG)    | • MCP and Tool Calls              | • Prompt Engineering                 |
| Data Science     | • Data Engineering, ETL Pipelines  | • ML/DL Modelling and Tuning      | • Model Deployment and MLOps         |
|                  | • Advanced Analytics and Insights  | • Visualization and BI Tools      | • Hypothesis Testing                 |

## INTERNSHIPS

**Investment Banking Intern, JP Morgan Chase & Co.**

Apr 2018 – May 2018 (2 months)

- Worked with the TMT Asia coverage team, analysing and valuing businesses to prepare pitching material for potential M&A deals.
- Received a pre-placement offer (PPO) to join the team full-time post completion of MBA.

**Data Science Intern, ePayLater**

Nov 2018 – Jan 2019 (2 months)

- Performed customer profiling for the microlending startup to improve its credit decisions and customize marketing outreach
